

Saidur Rahman

Full Stack Developer | AI Enthusiast | B.Tech CSE Graduate

saidurkushbari@gmail.com | +91-8822803368 | Guwahati, Assam | [linkedin.com/in/saidurrahman](https://www.linkedin.com/in/saidurrahman) | github.com/saidurrahman

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science graduate with practical Full Stack Development experience across internships and self-initiated AI-integrated projects. Proficient in PHP, JavaScript, React.js, FastAPI, and Python, with a strong foundation in database design, secure authentication, and responsive UI development. Built production-level applications including an AI mental health monitoring system and a PDF intelligence tool. Eager to bring technical versatility, a collaborative mindset, and a commitment to continuous learning to a forward-thinking engineering team.

TECHNICAL SKILLS

Languages JavaScript, PHP, SQL, Python (intermediate), C, HTML5, CSS3

Frameworks React.js, FastAPI, Axios, REST APIs

Databases MySQL, MongoDB

Tools Git & GitHub, Visual Studio Code, XAMPP, Postman

Concepts OOP, MVC, Database Normalization, JWT/AES-256 Auth, CRUD, Web Deployment, Agile

PROJECTS

MindPulse — AI-Based Mental Health Early Warning System

2024

Personal Project

React.js | FastAPI | MongoDB | JWT / AES-256 | Python

- Architected a full-stack AI system that monitors mental health patterns and generates a real-time wellness score (0-100) using behavioral data and assessment algorithms.
- Engineered secure end-to-end authentication with JWT token management and AES-256 data encryption, ensuring user privacy compliance.
- Built a personalized recommendation engine prescribing tailored exercises and daily routines based on each user's dynamic health score.
- Designed an intuitive React.js dashboard with trend visualization to help users track wellness over time.

PDF QnA System — AI Document Intelligence Tool

2024

Personal Project

React.js | FastAPI | Python | MongoDB | RAG | Axios

- Developed an AI-powered platform enabling users to upload PDFs and query document content through a natural language chat interface.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline to chunk, embed, and retrieve relevant PDF content, grounding chat responses in the document's actual text.
- Implemented persistent chat history in MongoDB for session continuity and context-aware multi-turn conversations.
- Built a complete authentication system (login/signup) with a role-based dashboard and integrated file management UI.

Student Management System

2023

Academic Project

PHP | MySQL | HTML / CSS / JavaScript | XAMPP | GitHub

- Engineered a full-stack web application for student record management featuring role-based access control (admin vs. student views).
- Applied parameterized queries and server-side validation to prevent SQL injection and ensure data integrity.
- Optimized database queries and applied normalization to improve record retrieval performance and reduce redundancy.

Library Management System

2023

Academic Project

PHP | MySQL | HTML / CSS / JavaScript | XAMPP | GitHub

- Built a digital library platform supporting book cataloging, user registration, and an issue/return system with duplicate-record detection logic.
- Delivered full cross-browser compatibility and mobile responsiveness through a clean, adaptive CSS layout.

- Applied 3NF database normalization to minimize redundancy and maximize storage and query efficiency.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern

Jan 2024 – Apr 2024

Tech Creative Solitude

- Developed and deployed dynamic web modules with secure user authentication and full CRUD operations using PHP, MySQL, HTML, CSS, and JavaScript.
- Collaborated within an Agile team to design, build, and ship responsive web applications within project deadlines.
- Improved deployment workflows and code quality by integrating Git version control and environment management via XAMPP.
- Diagnosed and resolved complex front-end and back-end issues, strengthening production-level debugging proficiency.

Academic Technical Intern

Jul 2023 – Sep 2023

Assam Engineering College | Guwahati, Assam

- Engaged in research-oriented engineering tasks, bridging theoretical concepts with practical project applications.
- Developed analytical thinking and cross-functional collaboration skills through mentored team assignments.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

May 2026

Assam Engineering College (AEC), Dibrugarh University | Guwahati, Assam

CGPA: 6.4 / 10 | Relevant Coursework: Data Structures and Algorithms, DBMS, OOP, Computer Networks, Web Technologies, Software Engineering

ADDITIONAL SKILLS & ACTIVITIES

- Graphic Design: Designed promotional posters and event banners for college programs, demonstrating visual communication and attention to detail.
- Animation & Media: Produced short animations for academic presentations and social media, combining technical and creative ability.
- Art Competitions: Participated in pencil drawing competitions at the college level, reflecting precision and creative thinking.
